Summary

Joshua Uzor is a Software Developer with 3+ years of experience and expertise in various roles, which he assumed working in tech teams. He writes efficient and reusable code that can stand the test of time and efficiency, with a dedication to writing quality performant code and an eye for a pixel-perfect design. An enthusiastic and analytical thinker who is hardworking, eager to learn and able to solve problems intelligently and grasp technical issues quickly. Excellent communication skills, problem solver and ability to manage and complete projects to the highest standards with minimal supervision with a demonstrated history of working in standard tech-companies, financial-technologies and in the information and services industry with years of experience both locally, internationally and remotely.
